

South Grafton Public School Vision 2021-2025

South Grafton Public School is an outstanding school which provides quality education within a very supportive and nurturing environment for all students in which learning, and collaboration is highly valued. Our two separate campuses, while both maintaining the positive features of a medium school environment, access all the resources and expertise that a large school can facilitate. Student welfare and well-being is a priority, and all students are encouraged to achieve success. South Grafton Public School is committed to promoting high expectations within a rich, diverse, and safe learning environment. We enable our students to become successful and creative learners, confident and resilient individuals, and active, informed citizens through equity and excellence in education. Our situational analysis clearly supports a school culture which is one of continuous school improvement with quality teaching aligned to Professional Learning. The Professional Development Plan process is driven by formative and summative data at all levels of student outcomes. In 2023 South Grafton Public School was identified in the top 100 schools in all sectors in NSW by the Australian Curriculum, Assessment and Reporting Authority as high achieving in this year's NAPLAN results, meaning students showed above-average literacy and numeracy results compared with pupils of similar socio-educational backgrounds.

Key values of South Grafton PS include:

Student Wellbeing

Quality Teaching

Diverse Opportunities

Best Practice

Community Partnerships

High Expectations and Standards

Enhanced Student Outcomes
